AGILENT / KEYSIGHT

Agilent/Keysight 34137A

Agilent/Keysight 34137A Overview This listing is a catalog accessory or spare in the Agilent / Keysight catalog. Public OEM literature for this exact SKU does not publish a dense numeric performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate. Applications Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

This unit

The Keysight 34137A is a premium test lead set engineered for use with the Keysight 3458A Digital Multimeter. This accessory delivers reliable connections and accurate signal transmission across demanding testing and measurement applications. The set features 1.4 m leads terminated with retractable sheath banana plugs rated to 1000V CAT II, ensuring safe operation in a variety of electrical environments. Accessories fitted onto the test leads are rated to 300V CAT II. The complete kit includes two test lead probes with retractable sheaths, two fine tip probes, two SMT grabbers, and one mini grabber - providing multiple connection options for diverse measurement scenarios. Technical Specifications Primary Lead Rating: 1000V CAT II Accessory Rating: 300V CAT II (for accessories fitted onto test leads) Lead Length: 1.4 meters Termination: Retractable sheath banana plugs Safety Standard: IEC 61010-031 Key Features Retractable sheath design

minimizes accidental contact hazards during operation Multiple probe and grabber configurations accommodate various test points and component types 1.4 m lead length provides adequate reach in typical benchtop measurement setups IEC 61010-031 compliance ensures safety across CAT II environments Typical Applications DC voltage and resistance measurements on electronic assemblies General-purpose electrical testing and troubleshooting Component-level characterization requiring multiple contact geometries Laboratory bench measurements demanding secure, repeatable connections Compatibility & Integration Primary Instrument: Keysight 3458A Digital Multimeter Modular accessory design allows field selection of probes and grabbers based on measurement requirements

34137A Characteristics / Specifications

PARAMETER	VALUE
Model	34137A
Brand	Agilent / Keysight
Catalog Title	Agilent/Keysight 34137A
Sku	34137A
Product Class	catalog accessory or spare
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	34137A
Manufacturer Line	Agilent / Keysight
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.

Applications

Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

Key Features

Catalog identity matched to brand, model, and SKU

Accessory or spare class rather than standalone instrument

No invented electrical performance numbers

Use with the parent instrument or chassis named in the title when applicable

Documented as thin because OEM numeric tables are not public
