AGILENT / KEYSIGHT

Agilent/Keysight 34937T

Agilent/Keysight 34937T Overview This listing is a catalog accessory or spare in the Agilent / Keysight catalog. Public OEM literature for this exact SKU does not publish a dense numeric performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate. Applications Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

This unit

The Agilent/Keysight 34937T is a detachable terminal block accessory that enables discrete external wiring connections for the 34937A and L4437A General Purpose Switch modules installed in the Keysight 34980A Multifunction Switch/Measure Unit. It features screw-type terminals and integrates with the relay switching architecture of compatible GP Switch modules to support a wide range of switching applications. Technical Specifications Wire Size Support: Up to 20 AWG for configurations with fewer than 100 connections; up to 24 AWG for configurations exceeding 100 connections Connection Type: Screw-type terminals for discrete external wiring Relay Ratings (34937A module): Four Form A (SPST) relays rated 5 A at 150 W per channel; twenty-eight Form C (SPDT) latching relays at 1 A; four Form A (SPST) latching relays at 5 A Power-Failure Configuration: Hardware jumper on the 34937A module defines the power-failure

state of 5 A latching relays - open or maintained state upon system power loss Snubber Circuit Pads: Solder pads provided on the 34937T for addition of snubber circuits to 5 A relays, reducing reactive transients when switching inductive loadsKey Features Flexible discrete wiring architecture with screw-type connections Support for multiple wire gauges depending on connection density Solder pad integration for transient suppression on inductive switching applications Hardware-configurable relay power-failure behaviorCompatibility & Integration The 34937T plugs directly into Keysight 34937A and L4437A General Purpose Switch modules within the 34980A mainframe. Integration with the 34980A platform requires proper grounding of the protective earth terminal to AC power mains and compliance with applicable safety protocols when switching mains voltage or high-inductive loads.

PARAMETER	VALUE
Model	34937T
Brand	Agilent / Keysight
Catalog Title	Agilent/Keysight 34937T
Sku	34937T
Product Class	catalog accessory or spare
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	34937T
Manufacturer Line	Agilent / Keysight
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.	
Applications	
Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.	
Key Features	
Catalog identity matched to brand, model, and SKU	
Accessory or spare class rather than standalone instrument	
No invented electrical performance numbers	
Use with the parent instrument or chassis named in the title when applicable	
Documented as thin because OEM numeric tables are not public
