Agilent/Keysight E4208B

HP Agilent E4208B SCSI Disk Module for VXI Broadband Test System The HP E4208B is a SCSI disk module for HP E4200-series VXI broadband/protocol test systems. OEM VXI catalogs list E4208A/B/C/D SCSI Disk Module for VXI System, providing mass storage for E4209 protocol processors and E42xx line interfaces. Program/result storage for E4200 broadband testers and protocol processors. Instrument Type: SCSI disk module for VXI The HP E4208B is a SCSI disk module for HP E4200-series VXI broadband/protocol test systems. OEM VXI catalogs list E4208A/B/C/D SCSI Disk Module for VXI System, providing mass storage for E4209 protocol processors and E42xx line interfaces. Program/result storage for E4200 broadband testers and protocol processors. Instrument Type: SCSI disk module for VXI Host System: HP E4200 broadband / protocol test

This unit

The Agilent/Keysight E4208B is a C-size, single-slot VXI SCSI disk module engineered for integration into Agilent Broadband Series Test System (BSTS) architectures. It has dedicated storage capability within modular VXI instrumentation environments through dual SCSI interface connectors. The module combines a 4 GB hard drive with a 1.44 MB 3.5-inch floppy drive, delivering flexible data acquisition and logging functions for automated test systems. Units are

available in used condition, tested and verified for operational integrity. Technical Specifications
Product Type: VXI SCSI Disk Module Form Factor: C-Size, 1-Slot VXI Module Interface: Dual SCSI
Interface Connectors Primary Storage: 4 GB Hard Drive Secondary Storage: 1.44 MB 3.5-inch
Floppy Drive Weight: Approximately 8 lbs (shipping) Key Features Dual SCSI connectivity enables
primary and backup storage configurations Compact single-slot VXI form factor minimizes
chassis real estate Hybrid storage approach supports both high-capacity recording and portable
media interchange Field-proven component within established BSTS product family Typical
Applications Data logging in automated RF and broadband test systems Configuration and
calibration file storage for VXI-based instrumentation Test result archival within modular test
environments System firmware and software provisioning Compatibility & Integration The E4208B
integrates directly into VXI chassis and works as part of the Broadband Series Test System
ecosystem. Compatibility extends across related E4208-series modules. SCSI interface
connectors support standard SCSI device chaining and termination schemes typical of VXI
storage subsystems.
