AGILENT / KEYSIGHT

Agilent/Keysight U2904A

Agilent/Keysight U2904A Overview This listing is a catalog accessory or spare in the Agilent / Keysight catalog. Public OEM literature for this exact SKU does not publish a dense numeric performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate. Applications Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

This unit

The Keysight U2904A is a 2-meter SCSI cable assembly engineered to connect and facilitate data transfer between the Keysight U2600A Series USB modular digital I/O modules and host systems. Built around a 100-pin SCSI connector, this cable integrates into measurement and test architectures requiring isolated digital I/O capability. Technical Specifications Cable Length: 2 meters Connector Type: SCSI, 100-pin Product Classification: Accessory Cable Electrical performance characteristics are determined by the connected U2600A Series module. Pin assignment and signal routing follow the specifications of the target U2600A device in use. Key Features 100-pin SCSI connector for robust, repeatable connections 2-meter length suitable for standard benchtop and rack-mount configurations Designed specifically for U2600A Series USB

modular digital I/O modules Pin-out configuration matches the electrical interface of connected U2600A hardware

Typical Applications The U2904A supports measurement and control systems built around Keysight's U2600A Series digital I/O platform, including automated test equipment (ATE), data acquisition, and industrial control interfaces.

Compatibility & Integration This cable is recommended for use exclusively with Keysight U2600A Series USB modular isolated digital I/O devices. Pin configurations are module-dependent; end-user applications must verify compatibility with the specific U2600A variant in their system. Complete pinout and electrical interface details are provided in the U2600A Series USB Modular Isolated Digital I/O Devices datasheet.

Product Status: This product is obsolete as of June 1, 2024 (last order date May 31, 2024). Keysight will provide technical support for 5 years from the discontinuation date.

U2904A Characteristics / Specifications

PARAMETER	VALUE
Model	U2904A
Brand	Agilent / Keysight
Catalog Title	Agilent/Keysight U2904A
Sku	U2904A
Product Class	catalog accessory or spare
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	U2904A
Manufacturer Line	Agilent / Keysight
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.

Applications

Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

Key Features

Catalog identity matched to brand, model, and SKU

Accessory or spare class rather than standalone instrument

No invented electrical performance numbers

Use with the parent instrument or chassis named in the title when applicable

Documented as thin because OEM numeric tables are not public
