ANRITSU

Anritsu MP2100A BERTWave Analyzer

Aumictech offers NIST-traceable calibration and repair for the Anritsu MP2100A. All calibrations are performed to NIST-traceable standards and ship with a certificate. Turnaround is typically 1–3 business days after receipt. This Anritsu MP2100A is listed at . Calibration is available separately from . Contact us for volume pricing or if you need multiple units. NIST-traceable calibration for the Anritsu MP2100A is (standard — pass/fail certificate and calibration sticker) or (full measured data at every test point, reference standards documented, traceability chain included). Turnaround is 1 to 3 business days after receipt. See full calibration details →

This unit

The Anritsu MP2100A BERTWave integrates a BERT and oscilloscope, optimized for testing optical transceivers and components. It supports various data rates and provides detailed waveform analysis capabilities, including eye diagram analysis, jitter measurement, and mask testing. The MP2100A enables efficient and accurate evaluation of optical devices, ensuring the reliability and performance of high-speed communication networks.

Features & description

From manufacturer datasheet

Anritsu MP2100A — Repair & Calibration Service

Aumictech offers NIST-traceable calibration and repair for the Anritsu MP2100A. All calibrations are performed to NIST-traceable standards and ship with a certificate. Turnaround is typically 1–3 business days after receipt. Standard Cal Pass/fail cert + NIST sticker Cal with Data Full NIST cert with measured values [Request Calibration](#) → [Request Repair Quote](#) →

Anritsu MP2100A price

This Anritsu MP2100A is listed at . Calibration is available separately from . Contact us for volume pricing or if you need multiple units.

Anritsu MP2100A calibration cost

NIST-traceable calibration for the Anritsu MP2100A is (standard — pass/fail certificate and calibration sticker) or (full measured data at every test point, reference standards documented, traceability chain included). Turnaround is 1 to 3 business days after receipt. See full calibration details →

Unit notes

The Anritsu MP2100A BERTWave integrates a BERT and oscilloscope, optimized for testing optical transceivers and components. It supports various data rates and provides detailed waveform analysis capabilities, including eye diagram analysis, jitter measurement, and mask testing. The MP2100A enables efficient and accurate evaluation of optical devices, ensuring the reliability and performance of high-speed communication networks.

Full OEM specifications
