ANRITSU

Anritsu MS02A Optical Spectrum Analyzer Module

Anritsu MS02A Optical Spectrum Analyzer Module The Anritsu MS02A is an optical spectrum analyzer module used in Anritsu modular optical test systems. Family OSA module literature emphasizes diffraction-grating or interferometric spectral analysis for telecom wavelengths with remote control from the host mainframe. Modular optical spectrum measurements in production andRandOptical test systems. Instrument Type: optical spectrum analyzer module The Anritsu MS02A is an optical spectrum analyzer module used in Anritsu modular optical test systems. Family OSA module literature emphasizes diffraction-grating or interferometric spectral analysis for telecom wavelengths with remote control from the host mainframe. Modular optical spectrum measurements in production andRandOptical test systems. Instrument Type: optical spectrum analyzer module Wavelength Domain: optical spectrum analysis

This unit

The Anritsu MS02A is a component designed for use with Anritsu network analyzers, enhancing their functionality and precision for various testing and measurement applications. Information available on the Anritsu MS02A is limited, with primary references indicating it is a "General Time

Base" component. While specific technical specifications are not readily available in detail, its function is understood to be integral to the operation of Anritsu network analyzers. Compatibility The Anritsu MS02A can be used with Anritsu network analyzers. Specific model compatibility is not detailed in the available documentation. Physical Characteristics Detailed physical dimensions and weight are not specified in the accessible documentation. Electrical Characteristics Specific electrical characteristics such as voltage, current, or power consumption for the Anritsu MS02A are not publicly detailed. Interfaces Information regarding the specific interfaces of the Anritsu MS02A is not provided in the available resources. Operation and Functionality The Anritsu MS02A functions as a "General Time Base" component. This suggests it plays a role in the timing and synchronization aspects of the Anritsu network analyzers it is integrated with, crucial for accurate measurement and analysis. Further details on its precise operational capabilities are not disclosed. Why Choose Aumictech for Anritsu MS02A? At Aumictech, we specialize in supplying high-end Anritsu test and measurement equipment. Whether you need reliable components for your existing network analyzer setup, specialized parts for complex testing environments, or assurance of product integrity, our team ensures that the Anritsu MS02A delivers maximum performance for your application.

MS02A Characteristics / Specifications

PARAMETER	VALUE
Model	MS02A
Instrument Type	optical spectrum analyzer module
Brand	Anritsu
Form Factor	modular plug-in
Host Control	mainframe controlled
Wavelength Domain	optical spectrum analysis
Fiber Interface Class	SMF optical input
Remote Path	via host GPIB/Ethernet class
Display	host system display
Analysis Functions Class	wavelength level SMSR class
Calibration Class	module calibration certificate
Operating Temperature Class	mainframe ambient
Power	powered by host mainframe
Intended Use	modular optical spectrum test
Series Family	Anritsu modular OSA
Connector Class	optical adapter on module
Sweep Control	host software
Marker Functions	host analysis markers
Dynamic Range Class	per MS02A datasheet row
Resolution Class	per MS02A datasheet row
Wavelength Range Class	per MS02A datasheet row
Faceplate Confirm Class	confirm exact span on module label
Wavelength range	Class: per MS02A datasheet row
Operating temperature	Class: mainframe ambient

General Specifications & Supplementary Characteristics

PARAMETER	VALUE
Operating temperature	Class: mainframe ambient
Operating Temperature	Class: mainframe ambient
Operating Temperature Class	mainframe ambient
Power	powered by host mainframe
Intended Use	modular optical spectrum test
Series Family	Anritsu modular OSA
Connector Class	optical adapter on module
Sweep Control	host software
Marker Functions	host analysis markers
Dynamic Range Class	per MS02A datasheet row
Resolution Class	per MS02A datasheet row
Wavelength Range Class	per MS02A datasheet row
Faceplate Confirm Class	confirm exact span on module label Notes From Anritsu modular OSA module family literature for MS02A. Exact wavelength span and RBW belong on the MS02A datasheet matching the module.

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.
