BRUEL & KJAER

Bruel & Kjaer SA 0013 2A / 2B Attenuator Scale

The Bruel & Kjaer SA 0013 is a precision attenuator scale designed for accurate signal attenuation in various audio and electronic testing applications. Featuring selectable attenuation ranges, it ensures precise control over signal levels, making it suitable for calibration and measurement tasks. Its solid construction and reliable performance make it an essential tool for audio engineers and technicians.

This unit

The Bruel & Kjaer SA 0013 2A / 2B Attenuator Scale is a precision accessory for signal attenuation control in audio and electronic measurement systems. It has selectable attenuation ranges to enable accurate adjustment of signal amplitude during calibration and measurement tasks. The scale facilitates direct reading of vibration, sound, or voltage levels when integrated with compatible Bruel & Kjaer instruments, making it essential for laboratory and field-based testing applications requiring precise signal level management. Technical Specifications Attenuation Ranges: Selectable for precise signal level control Signal Level Adjustment: Designed for accurate amplitude modification in audio and electronic testing Compatibility: Integrates with instruments such as the Bruel & Kjaer 2209 Impulse Precision Sound Level Meter and associated measurement devices Key Features Precision attenuation capability for demanding measurement

environments Direct-reading interface for vibration, sound, and voltage level assessment
Selective range operation enabling flexible signal control across multiple measurement tasks
Compatible with RMS detection systems featuring crest-factor capability up to 40 Supports peak
detection with 20 μ s rise time and hold facility on associated instruments Typical Applications
Audio and electronic test signal calibration Vibration measurement and analysis Sound pressure
level assessment Impulse response testing with response specifications of +3 dB for 0.1 to 5 ms
impulse durations and +1 dB for 0.5 to 2 ms impulse durations Laboratory and industrial
measurement tasks requiring signal amplitude control Compatibility & Integration The SA 0013 2A
/ 2B Attenuator Scale integrates with Bruel & Kjaer precision instruments equipped with AC and
DC outputs for connection to recorders and data acquisition systems. Associated devices operate
on 3 $\times$ 1.5V cells (IEC LR6, AA size), such as alkaline cells QB 0013, supporting portable field
deployment.

SA0013 Characteristics / Specifications

PARAMETER	VALUE
Model	SA 0013
Brand	Bruel & Kjaer
Catalog Title	Bruel & Kjaer SA 0013 2A / 2B Attenuator Scale
Sku	SA 0013
Product Class	catalog accessory or spare
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	SA 0013
Manufacturer Line	Bruel & Kjaer
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.	
Applications	
Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.	
Key Features	
Catalog identity matched to brand, model, and SKU	
Accessory or spare class rather than standalone instrument	
No invented electrical performance numbers	
Use with the parent instrument or chassis named in the title when applicable	
Documented as thin because OEM numeric tables are not public	
Technical Specifications
