This unit

The Eaton 94592-1 appears to be a component within Eaton's broader power distribution and management systems. While specific datasheet information for the "Eaton 94592-1" is not directly available through the provided search results, it can be inferred that this product is related to Eaton's extensive offerings in areas such as automatic transfer switches, power distribution units, circuit breakers, and uninterruptible power supplies. Eaton is a recognized leader in intelligent power management solutions, serving industrial, commercial, and enterprise-level applications. Related Eaton Product Families and Technologies Based on the search results, the Eaton 94592-1 is likely associated with one or more of the following Eaton product categories: * Automatic Transfer Switches (ATS): Eaton offers a range of ATS, including power frame type, molded case

type, bypass isolation, and contactor type. These are crucial for transferring loads between different power sources, particularly in critical applications. Key features of Eaton's ATS include high amperage capacity, various transition modes (open delayed, open in-phase, closed transition), UL 1008 listing, and options for arc flash reduction maintenance systems.

Power Distribution Units (PDUs): Eaton provides metered input rack PDUs with advanced cybersecurity features, suitable for data center environments. These PDUs offer multiple outlets, color-coded load banks, and toolless mounting for efficient power distribution and management.

Circuit Breakers: Eaton offers miniature circuit breakers (MCBs) with various tripping characteristics (e.g., Type C) and high switching capacities, designed for reliable protection against overloads and short circuits in residential and commercial applications.

Uninterruptible Power Supplies (UPS) and Power Conditioning: Eaton is a major manufacturer of UPS systems and related battery solutions, continuous power and protect sensitive equipment from power disturbances. They also offer power-suppressors that attenuate transients and noise on power lines, creating a clean and isolated power source.

Bus Systems and Switchgear: Eaton's product portfolio includes non-segregated phase bus systems (NSB) and switchgear solutions designed for power distribution and control in various industrial and utility applications.

Bypass Power Modules (BPM): These modules are designed as maintenance bypass switches for UPS systems, ensuring seamless, uninterrupted power transfer and providing output power distribution capabilities. The "94592-1" model number suggests it could be a specific part, accessory, or sub-component within one of these larger systems, potentially related to connectors, terminal blocks, or internal components of larger power distribution equipment. Without a specific datasheet for the 94592-1, its exact function and specifications remain to be detailed.

Why Choose Aumictech for Eaton Power Components? At Aumictech, we specialize in supplying high-end power management equipment. Whether you need reliable power distribution solutions, critical backup power systems, or advanced circuit protection components, our team ensures Eaton products deliver maximum performance for your application.

94592 Characteristics / Specifications

PARAMETER	VALUE
Model	94592-1
Brand	Eaton
Catalog Title	Eaton 94592-1 RF Measurement Probe
Sku	94592-1
Product Class	catalog accessory or spare
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	94592-1
Manufacturer Line	Eaton
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.

Applications

Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

Key Features

Catalog identity matched to brand, model, and SKU

Accessory or spare class rather than standalone instrument

No invented electrical performance numbers

Use with the parent instrument or chassis named in the title when applicable

Documented as thin because OEM numeric tables are not public
