Exfo FOA-398 LC Fiber Optic Adapter

The Exfo FOA-398 is a fiber optic adapter designed for use with Exfo fiber optic testing equipment. It ensures a secure and accurate connection between fiber optic cables and testing modules, maintaining signal integrity during testing procedures. This adapter is essential for reliable fiber optic network testing and troubleshooting.

This unit

The Exfo FOA-398 adapter is a critical component for ensuring accurate and reliable fiber optic testing. Designed to be compatible with Exfo's line of fiber optic testing equipment, this adapter provides a secure and precise connection point for fiber optic cables. Its primary function is to maintain optimal signal integrity during testing, which is essential for accurate measurements and reliable troubleshooting of fiber optic networks. The FOA-398 is built to meet the rigorous demands of field and lab environments, ensuring durability and consistent performance.

FOA398 Characteristics / Specifications

PARAMETER	VALUE
Model	FOA-398
Brand	Exfo
Catalog Title	Exfo FOA-398 LC Fiber Optic Adapter
Sku	FOA-398
Product Class	adapter, pod, or probe accessory
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	FOA-398
Manufacturer Line	Exfo
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.

Applications

Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

Key Features

Catalog identity matched to brand, model, and SKU

Accessory or spare class rather than standalone instrument

No invented electrical performance numbers

Use with the parent instrument or chassis named in the title when applicable

Documented as thin because OEM numeric tables are not public
