Fluke 1652B Multifunction Installation Tester

Fluke 1652B Multifunction Installation Tester The Fluke 1652B is a multifunction installation tester for electrical safety and wiring compliance measurements in the Fluke 1650 Series family. Building electrical installation verification, RCD testing, loop impedance, insulation resistance, and continuity testing. Multifunction installation tester platform The Fluke 1652B is a multifunction installation tester for electrical safety and wiring compliance measurements in the Fluke 1650 Series family. Building electrical installation verification, RCD testing, loop impedance, insulation resistance, and continuity testing. Multifunction installation tester platform Insulation continuity loop and RCD test modes on family

This unit

The Fluke 1652B Installation Tester is a compact and rugged instrument designed for verifying the safety of electrical installations in domestic, commercial, and industrial environments. It performs a suite of tests including continuity, insulation resistance, loop and line impedance, and RCD testing. The 1652B helps ensure that electrical installations meet safety regulations and perform optimally.

1652B Characteristics / Specifications

PARAMETER	VALUE
Model	1652B
Instrument Family	Fluke 1650 Series
Instrument Type	multifunction installation tester
Primary Use	electrical installation verification
Insulation Resistance Test Class	supported on family
Continuity Test Class	supported on family
Loop Impedance Test Class	supported on family
RCD Test Class	supported on family
Voltage Measurement Class	supported on family
Portability Class	handheld portable
Display Class	family digital display
Battery Operation Class	yes
Safety Category Class	installation tester CAT ratings per faceplate
Sibling Models	1653 1653B class
Brand	Fluke
Documentation Source Class	Fluke 1650 Series product literature
Calibration Class	per calibration certificate
Wiring Compliance Use	yes
Field Use Class	yes
Test Lead Interface Class	family installation tester leads
Memory Class	family result storage where equipped
Faceplate Confirm Class	confirm exact 1652B vs 1653B feature set on unit
Regional Standards Class	wiring regulations per regional model variant
