FLUKE

Fluke 5200A AC Voltage Calibrator

The Fluke 5200A AC Voltage Calibrator is a precision instrument designed for calibrating AC voltage measuring devices. It provides highly accurate and stable AC voltage outputs, ensuring the reliability and accuracy of voltmeters, multimeters, and other voltage measuring equipment. Ideal for calibration labs and service centers.

This unit

The Fluke 5200A AC Voltage Calibrator is a reliable source of AC voltage for calibration purposes. It delivers accurate and stable AC voltage signals, making it suitable for calibrating a wide range of voltage measuring instruments. This calibrator is an essential tool for maintaining the accuracy and reliability of voltmeters and other voltage measurement devices.

Features & description

From manufacturer datasheet

Fluke 5200A — Repair & Calibration Service

Aumictech offers NIST-traceable calibration and repair for the Fluke 5200A. All calibrations are performed to NIST-traceable standards and ship with a certificate. Turnaround is typically 1–3 business days after receipt. Standard Cal Pass/fail cert + NIST sticker Cal with Data Full NIST cert with measured values [Request Calibration](#) → [Request Repair Quote](#) →

Fluke 5200A price

This Fluke 5200A is listed at . Calibration is available separately from . Contact us for volume pricing or if you need multiple units.

Fluke 5200A calibration cost

NIST-traceable calibration for the Fluke 5200A is (standard — pass/fail certificate and calibration sticker) or (full measured data at every test point, reference standards documented, traceability chain included). Turnaround is 1 to 3 business days after receipt. See full calibration details →
