FLUKE

Fluke 5540B Multi-Product Calibrator

The Fluke 5540B is a multi-product calibrator for calibrating a broad workload of digital and analog meters and related instruments. It is part of the Fluke Calibration multi-product calibrator families used in calibration labs and electronic manufacturing. Dense public range tables vary by option configuration. Instrument Type: Multi-Product Calibrator. Instrument type: Multi-product calibrator. Detailed V/I/ohms/frequency/scope ranges depend on installed options. Confirm faceplate option labels and the 5540B product specifications for the exact configuration.

This unit

The Fluke 5540B Multi-Product Calibrator is a precision instrument designed for calibrating a wide array of electrical test equipment. It delivers accurate and reliable calibration across various parameters, ensuring the performance and traceability of your test tools. Its solid design and comprehensive capabilities make it suitable for demanding calibration environments.

Features & description

From manufacturer datasheet

Features

- Multi-product calibrator architecture
- Programmable precision source for common electrical functions
- Fluke Calibration ecosystem accessory support

Applications

- Multi-product meter calibration benches
- Production and cal-lab multifunction sourcing
- Workload coverage for common DMMs and related tools

5540B Characteristics / Specifications

PARAMETER	VALUE
Model	5540B
Manufacturer	Fluke
Instrument Type	Multi-product calibrator Notes Detailed V/I/ohms/frequency/scope ranges depend on installed options. Confirm faceplate option labels and the 5540B product specifications for the exact configuration.
Alias	5540B; Fluke 5540B

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.
