

GALIL MOTION CONTROL

Galil Motion Control MSA-12-80 Brush Type PWM Servo Amplifier

The Galil Motion Control MSA-12-80 is a brush-type PWM servo amplifier designed for precise motion control applications. It efficiently drives brush-type servo motors by utilizing pulse width modulation (PWM) technology, ensuring accurate and responsive performance. Ideal for industrial automation, robotics, and other high-precision positioning systems, this amplifier provides reliable and smooth motor control.

This unit

The Galil Motion Control MSA-12-80 is a brush-type PWM servo amplifier engineered for demanding motion control tasks. Employing PWM technology, it delivers efficient and accurate control of brush-type servo motors. This amplifier is well-suited for applications requiring high precision and responsiveness, such as industrial automation equipment, robotic systems, and precision positioning stages. Its solid design ensures dependable performance and smooth motor operation, making it a critical component in advanced motion control systems.

Features & description

From manufacturer datasheet

Galil Motion Control MSA-12-80 — Repair & Calibration Service

Aumictech offers NIST-traceable calibration and repair for the Galil Motion Control MSA-12-80. All calibrations are performed to NIST-traceable standards and ship with a certificate. Turnaround is typically 1–3 business days after receipt. Standard Cal Pass/fail cert + NIST sticker Cal with Data Full NIST cert with measured values [Request Calibration](#) → [Request Repair Quote](#) →

Galil Motion Control MSA-12-80 price

This Galil Motion Control MSA-12-80 is listed at . Calibration is available separately from . Contact us for volume pricing or if you need multiple units.

Galil Motion Control MSA-12-80 calibration cost

NIST-traceable calibration for the Galil Motion Control MSA-12-80 is (standard — pass/fail certificate and calibration sticker) or (full measured data at every test point, reference standards documented, traceability chain included). Turnaround is 1 to 3 business days after receipt. See full calibration details →

Unit notes

The Galil Motion Control MSA-12-80 is a brush-type PWM servo amplifier engineered for demanding motion control tasks. Employing PWM technology, it delivers efficient and accurate control of brush-type servo motors. This amplifier is well-suited for applications requiring high precision and responsiveness, such as industrial automation equipment, robotic systems, and precision positioning stages. Its solid design ensures dependable performance and smooth motor operation, making it a critical component in advanced motion control systems.

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

The Galil Motion Control MSA-12-80 is a brush-type PWM servo amplifier designed for precise motion control applications.
