JDS UNIPHASE

JDS Uniphase MAP+111110

The JDS Uniphase MAP+111110 is a module designed for the MAP-220 platform. This module provides essential functionality for optical testing and measurement, ensuring high performance and reliability. Ideal for advanced optical network characterization.

This unit

The JDS Uniphase MAP+111110 is a mainframe and integrated controller unit within the MAP-200 platform, engineered for optical test and measurement applications. This modular chassis is the operational backbone for instrumentation cassettes, enabling dynamic reconfiguration across diverse optical characterization and testing workflows. The controller automatically identifies installed modules and manages system operation through a color display and 9-key interface, supporting both local and remote command structures. Field-replaceable power and thermal management components simplify maintenance in production and laboratory environments.

Technical Specifications Platform: JDS Uniphase MAP-200 Series Chassis Type: Mainframe with integrated controller Model Number: MAP+111110 Slot Capacity: Typically 8 slots (Master configuration) Module Compatibility: Over 15 different MAP-200 instrumentation cassettes Hot-Swappable Operation: Cassettes insert and remove without system power-down Firmware: Dynamic MAP Firmware with automatic cassette identification User Interface: 9-key keypad for

local control; color display for system visualization Power Supply: Field-replaceable module Thermal Management: Front-panel fans Approximate Ship Weight: 34 lbs Key Features Non-disruptive module swapping enables rapid system reconfiguration and maintenance Automatic cassette identification simplifies multi-instrument deployment Integrated controller reduces external instrumentation requirements Front-panel design supports flexible mounting and operational access RS-232 and GPIB remote interfaces for automated and networked test environments Typical Applications Multi-parameter optical network characterization Production test and validation workflows Research and development optical measurements Field service and troubleshooting in optical systems Compatibility & Integration Designed for the MAP-200 platform ecosystem. Compatible 19-inch rackmount configuration available. Remote communication via RS-232, GPIB, and LXI-compliant interfaces on related MAP-200 chassis variants. Related benchtop and compact configurations support 2 and 3-slot populations.

MAP111110 Characteristics / Specifications

PARAMETER	VALUE
Model	MAP+111110
Brand	JDS Uniphase
Catalog Title	JDS Uniphase MAP+111110
Sku	MAP+111110
Product Class	JDSU MAP optical cassette or accessory
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	MAP+111110
Manufacturer Line	JDS Uniphase
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.

Applications

Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

Key Features

Catalog identity matched to brand, model, and SKU

Accessory or spare class rather than standalone instrument

No invented electrical performance numbers

Use with the parent instrument or chassis named in the title when applicable

Documented as thin because OEM numeric tables are not public
