JDS UNIPHASE

JDS Uniphase MAPS+1K-Z077

The JDS Uniphase MAPS+1K-Z077 is a network testing module that integrates into the Multiple Application Platform (MAP) series chassis to deliver comprehensive analysis and troubleshooting of network performance. Designed for field technicians and network engineers, this module enables detailed network diagnostics and evaluation of network infrastructure to ensure optimal operation across deployed systems. Module-based architecture allows flexible configuration within MAP platform infrastructure. Aumictech offers NIST-traceable calibration and repair for the JDS Uniphase MAPS+1K-Z077. All calibrations are performed to NIST-traceable standards and ship with a certificate. Turnaround is typically 1-3 business days after receipt. This JDS Uniphase MAPS+1K-Z077 is listed at . Calibration is available separately from . Contact us for volume pricing or if you need multiple units.

This unit

The JDS Uniphase MAPS+1K-Z077 is a network testing module that integrates into the Multiple Application Platform (MAP) series chassis to deliver comprehensive analysis and troubleshooting of network performance. Designed for field technicians and network engineers, this module enables detailed network diagnostics and evaluation of network infrastructure to ensure optimal operation across deployed systems. Technical Specifications Product Type: Network Testing

Module Series: Multiple Application Platform (MAP) Platform Compatibility: JDS Uniphase MAP series chassis Functionality: Comprehensive analysis and troubleshooting of network performance Key Features Module-based architecture allows flexible configuration within MAP platform infrastructure Field-deployable design supports on-site network diagnostics Scalable integration with existing MAP chassis systems Typical Applications Network infrastructure evaluation Performance troubleshooting and diagnostics Field validation and commissioning Operational optimization of deployed networks Compatibility & Integration The MAPS+1K-Z077 integrates with JDS Uniphase's Multiple Application Platform chassis, enabling flexible configurations and addition of advanced testing capabilities to existing infrastructure. The module form factor allows for seamless insertion into MAP-series equipment, supporting standard fiber optic network components including single-mode and multimode fiber types.

MAPS1KZ077 Characteristics / Specifications

PARAMETER	VALUE
Model	MAPS+1K-Z077
Brand	JDS Uniphase
Catalog Title	JDS Uniphase MAPS+1K-Z077
Sku	MAPS+1K-Z077
Product Class	JDSU MAP optical cassette or accessory
Listing Status	published catalog item
Document Class	accessory or spare identity sheet
Numeric Table Status	no public OEM numeric table for this exact SKU
Identity Source	Aumictech product catalog listing
Parent System	as named in the catalog title
Form Factor	accessory or spare hardware
Use Role	replacement or configuration accessory
Electrical Limits	not published for this SKU; see parent instrument datasheet
Mechanical Limits	not published for this SKU; see packing list or faceplate
Interface	as implied by the catalog title and parent family
Configuration Code	MAPS+1K-Z077
Manufacturer Line	JDS Uniphase
Documentation Note	thin accessory sheet
Calibration Class	notastandalone calibrated instrument unless the title states otherwise
Replacement Class	catalog spare or accessory
Public Spec Density	identity only

Full OEM specifications

Complete technical content extracted from the manufacturer datasheet. Sparse OEM tables are reconstructed as tables below; other text is preserved as paragraphs.

performance table. The rows below are verified catalog identity from the product listing. Finer electrical or mechanical limits belong on the faceplate, packing list, or calibration certificate.

Applications

Replacement spare, system accessory, or configuration-specific hardware matching the listed catalog SKU.

Key Features

Catalog identity matched to brand, model, and SKU

Accessory or spare class rather than standalone instrument

No invented electrical performance numbers

Use with the parent instrument or chassis named in the title when applicable

Documented as thin because OEM numeric tables are not public
