This unit

The Keysight/Agilent/HP E5515-61182 is a reference module designed for the Keysight 8960 Series 10 Wireless Communications Test Set. This reference board maintains measurement accuracy and reliability across the E5515C and E5515E mainframe platforms, supporting wireless device testing from design verification through manufacturing validation. Technical Specifications Frequency Coverage: 292 MHz to 2700 MHz, encompassing all commercial 3GPP and 3GPP2 frequency bands Output Level Range: -110 dBm to -13 dBm with modulation VSWR: Less than 1.2:1 from 400 MHz to 2000 MHz Channel Power Measurement Accuracy: Less than ± 1.0 dB Key Features Serves as calibration and reference standard for 8960 Series 10 test set measurements Compatible with both E5515C and E5515E mainframe configurations Supports upgrade paths from E5515B and E5515C to E5515E via hardware upgrade kits Enables testing across GSM, W-CDMA, HSPA+, cdma2000, 1xEV-DO, eHRPD, TD-SCDMA, and legacy standards Interfaces GPIB and LAN connectivity via the 8960 Series 10 mainframe platform Typical Applications RF measurement

verification, device performance validation, and network emulation testing for 2G through 3G wireless handsets and infrastructure components Compatibility & Integration The E5515-61182 integrates into E5515C and E5515E mainframes. The E5515C platform supports upgrade to E5515E capability using hardware upgrade sets. Compatibility verification with specific test application revisions may require direct consultation with Keysight sales support.

Features & description

From manufacturer datasheet

Features

- PCA/module number E5515-61182

Applications

- E5515C/E 8960 reference-module spare

E551561182 Characteristics / Specifications

PARAMETER	VALUE
Model	E5515-61182
Manufacturer	Hewlett Packard / Agilent / Keysight
Instrument Type	Reference Module
Alias	E5515-61182
Parent Instrument	E5515A/B/C/E 8960 wireless communications test set
Function	reference / LO reference assembly
Form	internal plug-in module
Related Host IO	E5515 60223 host I/O board
Related Analog	E5515 60166 LSS analog board
Related Board	E5515 60221 board
NotATest Set	module only; RF specs belong to E5515
Host Chassis	E5515
RF Parent	cellular/wireless format test (GSM/CDMA/WCDMA class per E5515 options)
Interface Parent	GPIO LAN of the E5515
Status	Agilent E5515 service part
Installation	match E5515 serial prefix and firmware
Cooling	E5515 chassis airflow
Power	E5515 internal supplies
Documentation	E5515C service guide module list
ESD	RF module PCA
Calibration	E5515 system cal after module swap
Compatibility	E5515 family only
Use	like-for-like reference module
Firmware	E5515 host firmware must match hardware Notes Reference-module identity from Agilent E5515-61182 in the 8960 E5515 family. Cellular

PARAMETER	VALUE
	format coverage is an E5515 option set, not this board. Confirm serial prefix.
Parent	E5515 wireless communications test set
