SPIRENT

Spirent Mobile Cabinet, Dimensions 39 x 23 x 77 Inches

The Spirent Mobile Cabinet provides a secure and mobile solution for housing and transporting network testing equipment. With dimensions of 39 × 23 × 77 inches, this cabinet offers ample space for various devices and accessories. Constructed with durability in mind, it ensures the safety and protection of valuable equipment during transit and on-site deployments.

This unit

The Spirent Mobile Cabinet is a transport and deployment enclosure engineered to house and protect network testing equipment in field and laboratory environments. Measuring 39 inches high × 23 inches wide × 77 inches deep, it delivers substantial internal volume for Spirent TestCenter chassis, modules, and accessories. Built for durability, the cabinet secures sensitive test hardware during transit and operational deployment across distributed testing scenarios. Technical Specifications Dimensions: 39" H × 23" W × 77" D Construction: Durability-focused design for sensitive equipment protection Primary Function: Secure transport and field deployment of network test systems Key Features Enclosed design protects equipment during transit and on-site operation Supports organization and centralized housing of test modules and appliances in lab

environments Enables mobility of complete test configurations between locations and projects
Accommodates standard Spirent rack-mount form factors Typical Applications Field deployment of
Spirent TestCenter appliances and modules to remote or customer sites On-premises lab
consolidation of Layer 2–7 test equipment Mobile test setups requiring secure, organized
equipment transport Network emulation and device validation workflows across multiple test
locations Portable test systems supporting full lifecycle validation phases Compatibility &
Integration The cabinet integrates with Spirent's test portfolio: Spirent TestCenter Appliances (C1,
C50, C50-100G series) Spirent Test Modules (Series 1000, Series 2000, Ethernet and Wi-Fi
modules) TestCenter chassis and modular test instruments Network testing accessories and
ancillary equipment that require cabinet-level security and organization

Spirent Mobile Cabinet — Repair & Calibration Service

Aumictech offers NIST-traceable calibration and repair for the Spirent Mobile Cabinet. All calibrations are performed to NIST-traceable standards and ship with a certificate. Turnaround is typically 1–3 business days after receipt. Standard Cal Pass/fail cert + NIST sticker Cal with Data Full NIST cert with measured values [Request Calibration](#) → [Request Repair Quote](#) →

Spirent Mobile Cabinet price

This Spirent Mobile Cabinet is listed at . Calibration is available separately from . Contact us for volume pricing or if you need multiple units.

Spirent Mobile Cabinet calibration cost

NIST-traceable calibration for the Spirent Mobile Cabinet is (standard — pass/fail certificate and calibration sticker) or (full measured data at every test point, reference standards documented, traceability chain included). Turnaround is 1 to 3 business days after receipt. See full calibration details →

Applications

Field deployment of Spirent TestCenter appliances and modules to remote or customer sites On-premises lab consolidation of Layer 2–7 test equipment Mobile test setups requiring secure, organized equipment transport Network emulation and device validation workflows across multiple test locations Portable test systems supporting full lifecycle validation phases Compatibility & Integration The cabinet integrates with Spirent's test portfolio: Spirent TestCenter Appliances (C1, C50, C50-100G series) Spirent Test Modules (Series 1000, Series 2000, Ethernet and Wi-Fi modules) TestCenter chassis and modular test instruments Network testing accessories and ancillary equipment that require cabinet-level security and organization

Unit notes

The Spirent Mobile Cabinet is a transport and deployment enclosure engineered to house and protect network testing equipment in field and laboratory environments. Measuring 39 inches high × 23 inches wide × 77 inches deep, it delivers substantial internal volume for Spirent TestCenter chassis, modules, and accessories. Built for durability, the cabinet secures sensitive test hardware during transit and operational deployment across distributed testing scenarios.

Technical Specifications

Dimensions: 39" H × 23" W × 77" D

Construction: Durability-focused design for sensitive equipment protection

Primary Function: Secure transport and field deployment of network test systems

Key Features

- Enclosed design protects equipment during transit and on-site operation
- Supports organization and centralized housing of test modules and appliances in lab environments
- Enables mobility of complete test configurations between locations and projects
- Accommodates standard Spirent rack-mount form factors

Typical Applications

- Field deployment of Spirent TestCenter appliances and modules to remote or customer sites
- On-premises lab consolidation of Layer 2–7 test equipment
- Mobile test setups requiring secure, organized equipment transport
- Network emulation and device validation workflows across multiple test locations
- Portable test systems supporting full lifecycle validation phases

Compatibility & Integration

The cabinet integrates with Spirent's test portfolio: Spirent TestCenter Appliances (C1, C50, C50
